Aims and Scope

Surface Science deals exclusively with fundamental theoretical and experimental studies in the physics and chemistry of surfaces. It covers topics contributing to a better understanding of basic phenomena occurring on surfaces; the word "surface" being interpreted to include free surfaces as well as interfaces generally.
A special feature of the journal is the periodic inclusion of proceedings of symposia and conferences on aspects relevant to the study of the physics and chemistry of interfaces.

Abstracted/indexed in:

Aluminium Industry Abstracts; Chemical Abstracts; Current Contents: Physical, Chemical and Earth Sciences; EI Compendex Plus; Engineered Materials Abstracts; Engineering Index; INSPEC; Metals Abstracts.

CONTENTS-Alert

Surface Science is included in CONTENTS-Alert, a free electronic current awareness service. CONTENTS-Alert delivers through E-mail the tables of contents of a selected group of journals in the field of Surfaces, Interfaces and Thin Films.

Subscription Information 1996

Volumes 343–366 of Surface Science (ISSN 0039-6028) are scheduled for publication. (Frequency: three times per month.)
Prices are available from the publishers upon request. A combined subscription to Surface Science volumes 343–366, Applied Surface Science volumes 93–104, and Surface Science Reports volumes 24–26 is available at a reduced rate. Subscriptions are accepted on a prepaid basis only. Issues are sent by SAL (Surface Air Lifted) mail wherever this service is available. Airmail rates are available upon request. Please address all enquiries regarding orders and subscriptions to:

Elsevier Science B.V.
Order Fulfilment Department
P.O. Box 211, 1000 AE Amsterdam
The Netherlands
Tel.: +31-20-485-3642, Fax: +31-20-485-3598

Claims for issues not received should be made within six months of our publication (mailing) date.

US Mailing notice – Surface Science (ISSN 0039-6028) is published three times per month by Elsevier Science B.V., Molenwerf 1, P.O. Box 211, 1000 AE Amsterdam, The Netherlands. Annual subscription price in the USA is US$ 7903 (valid in North, Central and South America only), including air speed delivery. Second class postage paid at Jamaica, NY 11431.
USA Postmasters: Send changes to Surface Science, Publications Expediting, Inc., 200 Meacham Avenue, Elmont, NY 11003. Airfreight and mailing in the USA by Publications Expediting.

♾ The paper used in this publication meets the requirements of ANSI/NISO Z39.48-1992 (Permanence of Paper).

Special regulations for authors – Upon acceptance of an article by the journal, the author(s) will be asked to transfer copyright of the article to the publisher. This transfer will ensure the widest possible dissemination of information.

Special regulations for readers in the USA – This journal has been registered with the Copyright Clearance Center, Inc. Consent is given for copying of articles for personal or internal use, or for the personal use of specific clients. This consent is given on the condition that the copier pays through the Center the per-copy fee stated in the code on the first page of each article for copying beyond that permitted by Sections 107 or 108 of the US Copyright Law. The appropriate fee should be forwarded with a copy of the first page of the article to the Copyright Clearance Center, Inc., 222 Rosewood Drive, Danvers, MA 01923, USA. If no code appears in an article, the author has not given broad consent to copy and permission to copy must be obtained directly from the author. The fee indicated on the first page of an article in this issue will apply retroactively to all articles published in the journal, regardless of the year of publication. This consent does not extend to other kinds of copying, such as for general distribution, resale, advertising and promotion purposes, or for creating new collective works. Special written permission must be obtained from the publisher for such copying.

Handbook on the Physics and Chemistry of Rare Earths

Edited by **K.A. Gschneidner, Jr.** and **L. Eyring**

VOLUME 21

©1995 434 pages Hardbound
Price: Dfl. 330.00 (US$206.25)
ISBN 0-444-82178-3

The contributions to this volume focus on selected chemical aspects of rare-earth materials. The topics covered range from a basic treatment of crystalline electric-field effects and chemical interactions in organic solvents, to separation processes, electrochemical beaviors which impact corrosion, oxidation resistance, chemical energy storage and sensor technology, and to analytical procedures.

Contents: Preface. Contents of volumes 1-20.
139. Separation chemistry *(R.G. Bautista).*
140. Corrosion prevention and control *(B.W. Hinton).*
141. High-temperature corrosion protection *(N.E. Ryan).*
142. Rare earth intermetallics for metal-hydrogen batteries *(T. Sakai, M. Matsuoka, C. Iwakura).*
143. Chemical sensors *(G.-y. Adachi, N. Imanaka).*
144. Crystal field in non-metallic (rare-earth) compounds *(D. Garcia, M. Faucher).* 145. Solvation and anion interaction in organic solvents *(J.-C.G. Bünzli, A. Milicic-Tang).*
146. Trace determination of lanthanides in high-purity rare-earth oxides *(V. Bhagavathy, T. Prasada Rao, A.D. Damodaran).*
Author index. Subject index.

VOLUME 22

©1996 816 pages Hardbound
Price: Dfl. 545.00 (US$340.75)
ISBN 0-444-82288-7

This volume covers various physical aspects of a wide range of rare-earth materials. Magnetic phenomena dominate the contents of the first four chapters which deal with thin films and layered structures, and intermetallic and nonmetallic compounds. The remaining two chapters deal with coherent emission and electronic structure calculations of lanthanide molecules.

Contents: Preface. Contents of volumes 1-21.
139. Separation chemistry
147. Synthesis and properties of single-crystal nanostructures *(C.P. Flynn, M.B. Salamon).*
148. Nanoscale rare earth-transition metal multilayers: magnetic structure and properties *(Z.S. Shan, D.H. Sellmyer).*
149. The $ThNm_{12}$-type compounds of rare earths and actinides: structure, magnetic and related properties *(W. Suski).*
150. Magnetic properties of nonmetallic lanthanide compounds *(L.K. Aminov, B.Z. Malkin, M.A. Teplov).*
151. Coherent emission in rare-earth materials *(F. Auzel).*
152. Electronic structure calculations for milecules containing lanthanide atoms *(M. Dolg, H. Stoll).*
Author index. Subject index.

LEADING PUBLICATIONS IN MAGNETISM

Handbook of Magnetic Materials

Edited by **K.H.J. Buschow**

The Handbook of Magnetic Materials has a dual purpose. As a textbook it is intended to be of assistance to those who wish to be introduced to a given topic in the field of magnetism without the need to read the vast amount of literature published. As a work of reference it is intended for scientists active in magnetism research. To this purpose the handbook is composed of topical review articles written by leading authorities. In each of these articles an extensive description is given in graphical as well as in tabular form, much emphasis being placed on the discussion of the experimental material in the framework of physics, chemistry and materials science.

"...these volumes will be the most comprehensive work to date on the subject of ferromagnetism ... wherever the experimentalists are playing, they will find these volumes a must..."
Physics Today

Journal of Magnetism and Magnetic Materials

Editor:
A.J. Freeman, *Dept. of Physics and Astronomy, Northwestern University, Evanston, IL 60208-3112, USA*

Associate Editors:
G. Bate, *Santa Clara, CA, USA*
J.G. Booth, *Salford, UK*
I.A. Campbell, *Orsay, France*
R.W. Chantrell, *Keele, UK*
H. Fujimori, *Sendai, Japan*
V.I. Ozhogin, *Moscow, Russia*

AIMS AND SCOPE
The *Journal of Magnetism and Magnetic Materials* provides an important forum for the disclosure and discussion of original contributions covering the whole spectrum of topics, from basic magnetism to the technology and applications of magnetic materials and magnetic recording. The journal encourages greater interaction between the basic and applied subdisciplines of magnetism with short but comprehensive review articles, a rapid publication channel with "Letters to the Editor", in addition to full-length contributions. In 1990, a section on *Information Storage: Basic and Applied* was introduced where articles on all topics in magnetic recording media and processes are published.

The journal includes a separate section INFORMATION STORAGE BASIC AND APPLIED where articles on all topics in magnetic recording media and processes are published.

Subscription Information 1996: Volumes 150-162 (39 issues)
Price: Dfl. 7358.00 (US$4487.00)
ISSN 0304-8853

SURFACE SCIENCE

A journal devoted to the physics and chemistry of interfaces

Instructions to Authors (short version)

Submission of papers

Manuscripts (one original + two copies) should be sent, depending on the country of origin, to the editor or one of the regional editors as follows:

Dr. Charles B. Duke (editor): manuscripts from North and South America, Asia (except Japan), Australia and New Zealand and Surface Science Letters from *all* countries
Prof. Yoshitada Murata: Japan
Dr. Richard M. Lambert: Europe apart from Germany and Austria, Africa
Prof. Klaus Wandelt: Germany and Austria

(for addresses see inside front cover)

Original material. Submission of a manuscript implies it is not being simultaneously considered for publication elsewhere and that the authors have obtained the necessary authority for publication.

Refereeing. Authors are encouraged to list the names (addresses and telephone numbers) of three to four individuals who are qualified to serve as referees for their paper. The referees selected will not necessarily be from the list suggested by the author.

Manuscript preparation

All manuscripts should be written in good English. The paper copies of the text should be prepared with double line spacing and wide margins, on numbered sheets.

Structure. Please adhere to the following order of presentation: Article title, Author(s), Affiliation(s), Abstract, Keywords and PACS codes, Main text, Acknowledgements, Appendices, References, Figure captions, Tables.

Corresponding author. The name, complete postal address, telephone and fax numbers and the e-mail address of the corresponding author should be given on the first page of the manuscript.

Keywords/PACS codes. Authors are requested to supply one or more PACS-1995 numbers and a maximum of eight keywords from the keyword list, published in the last issue of every volume. Detailed instructions are given above the keyword list itself.

References. References to other work should be consecutively numbered in the text using square brackets and listed by number in the Reference list. Please refer to the more detailed instructions for examples.

Illustrations

Illustrations should also be submitted in triplicate: one master set and two sets of copies. The *line drawings* in the master set should be original laser printer or plotter output or drawn in black india ink, with careful lettering, large enough (3–5 mm) to remain legible after reduction for printing. *Photographs* should be originals, with somewhat more contrast than is required in the printed version. They should be unmounted unless part of a composite figure. Any scale markers should be inserted on the photograph itself, not drawn below it.

Colour plates. Figures may be published in colour, if this is judged essential by the editor. The publisher and the author will each bear part of the extra costs involved. Further information is available from the publisher.

After acceptance

Notification. You will be notified by the editor of the journal of the acceptance of your article and invited to supply an electronic version of the accepted text, if this is not already available.

Copyright transfer. In the course of the production process you will be asked to transfer the copyright of the article to the publisher. This transfer will ensure the widest possible dissemination of information.

Page proofs. When page proofs are made and sent out to authors, this is in order to check that no undetected errors have arisen in the typesetting (or file conversion) process. No changes in, or additions to, the edited manuscript will be accepted.

Electronic manuscripts

The publisher welcomes the receipt of an electronic version of your accepted manuscript. If there is not already a copy of this (on diskette) with the journal editor at the time the manuscript is being refereed, you will be asked to send a file with the text of the accepted manuscript directly to the publisher by e-mail or on diskette (allowed formats 3.5" or 5.25" MS-DOS, or 3.5" Macintosh) to the address given below. Please note that no deviations from the version accepted by the editor of the journal are permissible without the prior and explicit approval by the editor. Such changes should be clearly indicated on an accompanying printout of the file.

Author benefits

No page charges. Publishing in Surface Science is free.

Free offprints. The corresponding author will receive 50 offprints free of charge. An offprint order form will be supplied by the publisher for ordering any additional paid offprints.

Discount. Contributors to Elsevier Science Journals are entitled to a 30% discount on all Elsevier Science books.
